Shamir SV III As Worn™

SHAMIR SV III As Worn™ offers single vision patients two breakthrough benefits - lenses that are ultimately personalized to the individual prescription, as well to frame choice.

By applying the most advanced optics technologies to the SV lens, Shamir now offers single vision patients today's sharpest, most comfortable visual experience.

AsWorn Quadro™ Technology

Technology enuring a measurement faithful visual experience.

As-worn Quadro technology enables Shamir lens developers to ensure that the exact same visual clarity and comfort eyeglass wearers experience with trial frames and that eyesight measurements are maintained when their new lenses are fitted.

Facilitating precision personalization and customization of lenses to specific frame shapes, tilt angles, and distance from wearers' eyes. It ensures the right power corrections are maintained without compromising the frame of choice.

The main benefit

The ability to produce lenses with greatly reduced sensitivity to frame tilt variations, that deliver enhanced visual performance in any chosen frame.

Eye-Point™ Technology

Precise measurement and simulation based lens personalisation technology.

Eye-point III is technology enabling delivery of personalized lenses with wide, distortion-free viewing fields, standardized for both hyperopic (farsighted) and myopic (nearsighted) eyeglass wearers.

Relying on precise measurements and prescriptions, and on simulation of perceived, real-world viewing fields, the technology enables lens designers to achieve precise power profile control, and apply specific power emphasis at different points and vision zones across lens surfaces.

The main benefit

The ability to produce lenses any prescription and frame choice to achieve a clear and comfortable visual experience, while ensuring the most natural viewing postures, accommodating the use of digital devices.

CLEAR ADVANTAGES FOR PATIENTS.

- Personlaised lens, custom designed for patient.
- Available with any frame.
- Wider viewing fields
- Sharp vision.

CLEAR BENEFITS FOR ECP'S.

- Industry leading option for enhanced vision.
- Provide confidence building technologies.
- Default choice for practitioners who choose quality products.

Material Availability

Material	Prescription Range [D]
1.5 Hard Resin Clear, Blue Zero™, NuPolar® Polarized, Infinite, Mirror & Gradient, Transitions® GN8™ Transitions® XTRActive®, Transitions®, Style Colors & Transitions® Drivewear®	-7.00 to +6.00
1.53 DLC™ Clear, Blue Zero™, NuPolar® Polarized, Transitions® Signature®, Transitions® Vantage & Transitions® XTRActive®	-8.00 to +6.00
1.59 Polycarbonate Clear, NuPolar® Polarized & Gradient, Transitions® Signature®, Transitions® XTRActive® & Transitions® Drivewear®	-8.00 to +6.00
1.6 SuperLite® Clear, Blue Zero™, Tribrid™, NuPolar® Polarized, Transitions® Signature® & Transitions® XTRActive®	-10.00 to +6.00
1.67 SuperLite® Clear, Blue Zero™, NuPolar® Polarized, Transitions® Signature® & Transitions® XTRActive®	-10.00 to +8.00
1.74 SuperLite® Clear, Transitions® Signature®	-13.00 to +13.00

To order Shamir SV II As Worn™, simply provide the following information:

- Patient prescription
- Frame data: A, B and DBL or rame tracer file
- Fitting height (center pupil)
- Mono PD (far)
